

In the claims:

Please amend claim 15 as follows:

- Sub
C1
B1
15. (amended) A fuel composition, comprising:
gasoline; and
a gasoline additive concentrate composition, comprising:
a solvent that is an aromatic hydrocarbon, a mixture of an alcohol and an aromatic hydrocarbon, or a mixture of an alcohol and a kerosene having some aromatic content;
an alkoxyated fatty amine; and
a partial ester having at least one free hydroxyl group and formed by reacting at least one fatty carboxylic acid and at least one polyhydric alcohol wherein the fuel composition reduces the fuel consumption of a gasoline internal combustion engine, and the solvent allows the concentrate composition to be a liquid at a temperature of about 0°C to minus 18°C.

Please add claims 20 – 30 as follows:

20. (new) The fuel composition of claim 15 wherein the alkoxyated fatty amine is represented by the formula

wherein R is a hydrocarbyl group having about 4 to 30 carbon atoms, A¹ and A² are vicinal alkylene groups, and the sum of x and y is at least 1.

21. (new) The fuel composition of claim 20 wherein the alkoxyated fatty amine is a diethoxylated fatty amine having about 16 to 18 carbon atoms.
22. (new) The fuel composition of claim 15 wherein the fatty carboxylic acid has about 4 to 30 carbon atoms.
23. (new) The fuel composition of claim 15 wherein the fatty carboxylic acid is a saturated aliphatic monocarboxylic acid or an unsaturated aliphatic monocarboxylic acid.
24. (new) The fuel composition of claim 15 wherein the fatty carboxylic acid is oleic acid.

25. (new) The fuel composition of claim 15 wherein the polyhydric alcohol is glycerol or ethylene glycol.

26. (new) The fuel composition of claim 15 wherein the partial ester is a mixture of glycerol monooleate and glycerol dioleate.

b2 27. (new) The fuel composition of claim 15 wherein the concentrate composition further comprises a polymeric pour point depressant.

28. (new) The fuel composition of claim 27 wherein the polymeric pour point depressant is a terpolymer formed by polymerizing a dialkyl fumarate, a vinyl carboxylate, and a vinyl ether.

29. (new) The fuel composition of claim 15 wherein the concentrate composition further comprises a nitrogen-containing detergent selected from the group consisting of a polyetheramine, an aliphatic hydrocarbon-substituted amine, a Mannich reaction product formed by reacting an aliphatic hydrocarbon-substituted phenol and an aldehyde and an amine, and mixtures of two or more thereof.

30. (new) The fuel composition of claim 29 wherein the polyetheramine is formed by hydrogenating a nitrile which is prepared by reacting a polyalkoxylated alcohol or alkylphenol and acrylonitrile.

Please cancel claims 1-14, 16 and 17.
